

LARGE METERS ASSET OR LIABILITY?

Large Meters are your revenue workhorses, typically representing up to 80% of Utility revenue and just 20% of the meter population. A utility's fiscal health rests on the efficiency, accuracy and dependability of their large meters.

Over time heavy usage and wear take a toll on large meter accuracy... and the resulting under-registration negatively impacts your budget. In fact, even the smallest imprecision **translates into thousands of lost dollars in revenue** each month!

For over 45 years Measurement Control Systems has helped clients test, calibrate, repair and/or replace water meters.

Neptune 2010 Large Meter Replacement Promotion:

- New High Performance Protectus® III Stainless and TRU/FLO Compound meters
- NSF/ANSI 61 Annex F and Annex G compliant
- Complimentary customized payback analysis of meter change-outs (SEER Program)
- Discount determined by meter size (see back for details)

MCS Field Testing:

- Certified testing/calibration technicians
- Confirmation that meters are sized correctly
- Validate SEER/prioritization analysis

MCS Large Meter Maintenance:

- Annual maintenance programs pay for themselves
- Proper maintenance improves meter accuracy up to 20%
- Outsourcing annual maintenance is a cost-effective way to meet AWWA M6 guidelines

Contact us today at 800-826-1682 for a complimentary economic analysis of your large meters.
