

Nicor Inc. Read-Rite™ Polymer Lids

Read-Rite™ Hydrozone HD Lids bring specifically engineered, patented technology to Utility and Water Works customers. The high impact Read-Rite™ polymer construction provides a virtually RF transparent solution making it ideal for all AMR/AMI installations. Read-Rite™ Lids resist common automotive chemical exposure, ultraviolet degradation, and perform in the meter pit at temperature extremes.

Ideal for AMR/AMI Systems

- RF transparency improves performance
- Integrates with all AMR/AMI systems

Lightweight and Strong

- Up to 80% lighter than concrete
- H 20 load rated for light and incidental traffic

Demonstrated Performance

- Xenon Arc tested for UV degradation
- ADA compliant for slip-resistance
- Temperature range of -40°F to 190°F

Seamless Installation

- Simple mounting
- Direct replacement for current lid
- Custom sizing; multiple colors available

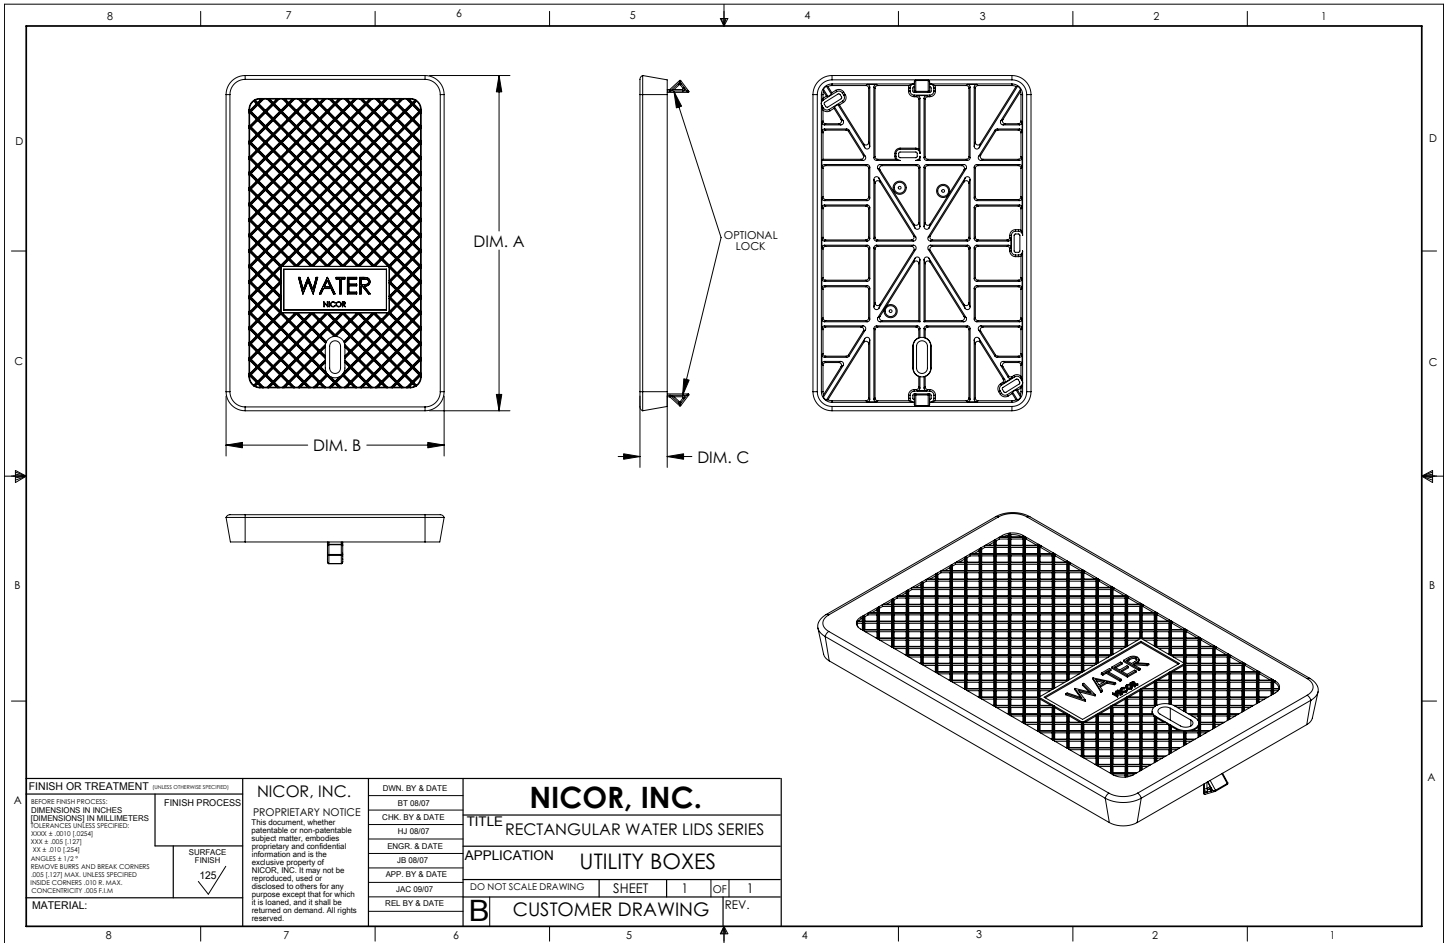

Read-Rite™ offers a complete line of lid products that can be customized by size, shape, color and embossed with a municipal logo.

Sample colors:
